Hi Wayne,I see... I didn't realize sometimes these things were made with different cabinet shapes, grill cloths, etc.Well, all I know about the tubes so far is it uses Type 43 tubes. As for the others, I'll have to look more closely this weekend. (I'm on the road during the weekdays.)I'm guessing this was made during WWII because the power transformer has "Victory Model" or something to that effect on an attached paper tag.The cabinet appears to be mahogany.Regards,Mark
