Hi. I have a map dated April 4, 1940. It is an RCA Victor shortwave listener guide. Along the right side it lists frequencies for the world. Along the bottom it shows frequencies for North America. It is a map of Europe with the different locations of the British fleet, a British Blockade off Iraq. It also shows where the German fleet is as well. It has small pictures of different classes of warships, including The British Battleship, the Hood, which was sunk by Bismark a year later. Any info, on where I could find a value for this map would be appreciated. It is in excellent shape.
