Hello! I recently came into possession of an old radio. I believe it is an Automatic brand radio from what I can tell from the label on the front (it is a little worn off but still readable). This is the only identifying marking on the radio. There is no model number, serial numbr, etc. It is in an ivory colored plastic case (cracked on the top and bottom). Is there a source anywhere where I can get help in identifying the model and year of this radio? Any help would be greatly appreciated. Thank you, Steve.
