I have an Admiral AM FM tube radio, probably from the 60's or 70's that I am trying to identify the model number, as I need to get a schematic for troubleshooting purposes. The model number was on a tag attached to the bottom of the radio that has detoriated with age and this information is missing. Here is all the information that I have found:Mfg.: Admiral (Made in Japan for Admiral)Serial Number: 522406Chicago 47, IllinoisInside the radio case is stamped:T40.11.1WATABEInformation that is still visible on the tag located on the bottom of the radio:Tubes listed for the radio:12AV6 – 1 each12BA6 – 2 each12BE6 – 1 each17EW8 – 1 each50EH5 – 1 eachAlso, on the tag is stamped N40D440-282The radio is in a wooden case, has 2 speakers, one on each side with the controls and station dial in the center section.Has 4 Control Knobs:(Off/On/Volume)(Tone)(AM/FM/AFC/Phono)(Tuning)On the back there is a Phono input jack as well as FM antenna terminals.The dimensions of the radio are:14 inches wide by 5.5 inches deep by 8 inches tall.This is all the information that I have found or identified; any help in identifying the model number of this radio is greatly appreciated.
