With the "Ultimate AM Antenna", from here on the Gulf Coast I am picking up at night:KLVI-AM 560 Beaumont, TX 5,000 watts (day & night) 190 milesWSB-AM 750 Atlanta, GA 50,000 watts 550 milesKBAP-AM 820 Ft. Worth, TX 50,000 watts 440 milesWWL-AM 870 New Orleans, LA 50,000 watts 90 miles (so clean it sounds FM day or night)WLS-AM 890 Chicago, IL 50,000 watts 980 milesKMOX-AM 1120 St. Louis, MO 50,000 watts 730 milesKXKW-AM 1130 Shreveport, LA 50,000 watts 270 milesWOAI-AM 1200 San Antonio, TX 50,000 watts 470 milesAnd many closer stations. This loop antenna certainly exceeds all expectations I had for AM.
