I would like to know where one can buy AudioQuest Type 4+ speaker wire at the lowest price on the market? I am thing of putting it between the walls and putting a face plate on the wall. Has anyone done this before? How did the sound come out? What would be the next step above AudioQuest Type 4+ wire? How much more would it be? Would it be a wast of money? I am looking at Axiom M60v2 speakers to go with my Yahama 861 Receiver and Marantz CD Changer.
