My son-in-law suggested I try XoftSpy. Free download. Sorta!It found something called worm.p2p.tankedAnd that my search bar had been "hijacked" So it has the usual checkboxes and "remove" clickbox.....Which asks that you register.....OK.....Pay \$40 to register!No pay, No play\$40 is fair but doesn't that sound like blackmail or piracy or baratry (love that word) or something?
