I have had the 400X (rebuilt by BizzyBee) for about 3 years now and it's the best piece of gear I've owned. The FM tuner is about as good as it gets. I used it with the JD-100 CD player and for speakers I have a set of JBL L-36s. The mods include replacing the 7868s with EL34s, and 12AT7s in driver/phase inverters - lower gain than the original 12AX7s, but plenty for the EL34s.
