Hello Steve,Thank you very much for your kind advice.Yes, it is 285, not 825, and I also found the feeding DC voltage mentioned on the metal label.It says 220V. May I ask you one more question, how do you get such high DC voltage for feeding ? Is there any AC/DC converter for this ratings ?Keisuke Aoyagimiloptik2@catv296.ne.jp1-18-8, Asahigaoka, Yotsukaido-shi,chiba-ken, Japan 284-0024phone 0081-43-432-9074
