Hello I wonder if any one can help me, I have recently got hold of my Dad's old hi fi system an old Marantz turntable and a 6100 amp with which he has always used a pair of Monitor audio speakers, the label on the back says MA7 S/N 6012 Can anyone shed any light on these for me. Are they good speakers or would I be able to buy better modern speakers, and are they suitable with the setup mentioned thanks for your time guys. Mike
