My friend in the TV/Audio business loaned me a variac. He had to scrounge to find one. I've fired up the bogen with a 12 hr breakin. Going to listen tonite. Pilotone is next. I have a bunch of mono blues and jazz recordings in 78 and 33 from the 50's I picked up at an auction. I'm thinking the pilotone is just the ticket. Now I need to find a tt with 78. My old technics is 33 and 45.
