Does any one know anything about Paradox TA-12 speakers? They were made by Sonic Energy System back in 197x. I came across a pair in very good condition and would like to restore them. Would it worth my effort? The quality of the sound is great.There is an article about this speaker in March 1977 issue of High Fidelity magazine. Anyone has read the article and can share a copy?Any help to find out about these speakers are appreciated.ThanksBob
