Hi Wayne, I spent a great deal of time studing the circuit to make sure I did it right the first time. I felt very confident that I was wiring these pots up exactly as you had advised me. Using all three contacts on the balance pots. Now you suggest I lift the grounds ? You can see why I had first hesitantly asked if you might draw me a picture of the what should be fairly simple wiring. This old amp is very messy inside and I don't want to experiment and possibly do damage to this very special amp of mine.I know I can just forget the balance pot, wire up the volume and hope the left and right levels match, but... I spent a lot for that balance pot and of course would like to use it in my system.I'm sure there is an exact correct way to do what I need and I was hoping you could help me with that or perhapes refer me to one of the other audio guru's that may be able to assist.I do so appreciate your help.Sincerely, Peter
