I know this is a long shot but I gotta try. I'm trying to locate a a similar type of receiver that I used to own in the early 80's. I thought it was a Sansui but I could be wrong. It had a all black face with blue numbers back lit, also a red led for a pointer. The outer case was woodgrain. I keep searching Ebay but all the Sansui's I see look nothing like what I'm looking for. Thanks for reading this and if you can help, Ken
