Subject: Help locate or ID receiver Posted by ken on Wed, 19 Dec 2007 02:52:27 GMT View Forum Message <> Reply to Message

I know this is a long shot but I gotta try. I'm trying to locate a a similar type of receiver that I used to own in the early 80's.I thought it was a Sansui but I could be wrong. It had a all black face with blue numbers back lit, also a red led for a pointer. The outer case was woodgrain.I keep searching Ebay but all the Sansui's I see look nothing like what I'm looking for. Thanks for reading this and if you can help, Ken
