---

I am looking to buy a nice amp for my fender strat. I play in a church band and have just borrowed an amp..but i think it is time to get my own. I dont need a whole cab worth of power..something that is a good strong amp, but also small enough that i can carry around to and from my dorm room every week. What are some good amps out there that would fit my needs that are not too expensive...i dont really need the best of the best..just a good sound for a good price.
