I have made this schematic with a technic who doesn´t have experience with tubes amps. Someone can take a look and say if it is all right or not?I have a Fender Hot Rod Deluxe 8 ohms and 40watts.The schematic is there:http://img295.imageshack.us/img295/8532/dummyloadpowersoak0wa.jpgThe values here:R1: 8,2 Ohms / 60 WattsR2: 22 Ohms / 3 WattsR3: 33 Ohms / 3 WattsR4: 2k Ohms /1 or 2 Watts L1: 0,5 mH / 0,5 A L2: 25 mH / 0,5 AC1: 470 uF / 50 V C2: 470 uF / 50 V P : 200 Ohms / 1 or 2 Watts Thank you!
