
Subject: Adding a cabinet to my 65W solid-state amp

Ive got a vga v-guitar amp from Roland. I bought it a few years, and between my amp and my ibanez jet king I dont see myself changing anytime soon. My amp only has 1 12" and 65W, and it has a line out. I'm wondering if theres a way to get a cab for my amp, or if a powered amp and cabinet would be sufficient.
