This little troll polluted this board with his stupid comments on the same day, July 15. Who is the moderator of this forum? BTW - Shane, of course you're right...but the problem of those Internet forums is that some kid can provoke people who have had tens of guitars and amps during the years/decades, done recordings, live concerts, etc. Even built and modified their amps, speakers...Because of this we need a serious moderation of all audio forums on ART, IMO - to avoid bad fate of some other forums... It's better to have a small number of posts, but the quality ones...IMO/IME and YMMV...
