Subject: 70's Tweed Twin Reverb ??? Posted by Roy G on Thu, 06 Mar 2008 02:52:16 GMT View Forum Message <> Reply to Message

I bought brand new from a Fender dealer in the late 70's a Twin Reverb(135W) Silverfaced amp in a Tweed covering. The dealer said this was the only one they could get and I've had it ever since. I have never seen another tweed twin of this vintage. Does anyone have any information on this amp??. The inside case still has all of it's original stickers and tags.
