If you use Behringer gear lets hear from you. Tips, tricks, the good, the bad, the ugly. If you want to rant, fine, just have real world experience with the gear. Just start a thread for the model you want to discuss. I currently own a DEQ2496, 2 MDX4600 compressors, and a CX2310 crossover, which I'm going to upgrade to the DCX2496 asap. The DEQ is an amazing piece of gear. I'm still exploring it's possible uses.
