Subject: Re: Live reverb, industry standard affordable Posted by Aki on Sat, 14 Mar 2009 06:30:42 GMT View Forum Message <> Reply to Message

I have an M-ONE in my home recording rack. It's not terribly expensive and reverb sounds okay for the price.Only thing is, after a couple of years of use, my M-ONE's power supply seems to have gone south. Now, when I power it up it comes up with garbled display that looks like a Klingon script. I'm too lazy to open it up to see what's wrong.
