Subject: Re: Connecting Multiple Speakers to One Amp Channel Posted by 99bottles on Thu, 01 Nov 2007 20:34:47 GMT View Forum Message <> Reply to Message

If the amp is made to take low impedance loads, I'd connect in parallel. It will develop more power across the load that way. Otherwise, I'd connect series/parallel so I didn't stress the amp. Give me the extra overhead any day.
