Ok folks, here's the deal. Sometime ago a guy I did some work for gave me about 1000 tubes for $100 plus what he owed me. I've picked through the lot and taken some driver tubes and the few power tubes that were in there. I've sold a few sets of the ham specific tubes on Fleabay, made my $100 back and decided that it is too much grief, trouble, and stress to sell any more there. I am not a salesman or business man and don't have the stomach for it. So, if anyone is interested in taking what's left off my hands for free I'll be more than willing to bring them to Tulsa. Realize that many of these are TV tubes, pulls, but some are new. If you want them you have to take them all, no picking and choosing, cuz I don't want to bring any back. If you'd like a list of what I have I can email you a completed list by this weekend.
