We just had a new sound board put in at our church. A new mixer with 16 channels and well, its the latest and greatest. My point is, if you have a business that does installs of sound equipment, a good market out there for you to tap into are churches. Our church has about 125 people on any given Sunday and there usually is about 4 mics in play on any given Sunday. At Christmas time, we will probably be using all 16 channels. Just a heads up!
