Yeah, I watched it when it came on TV after listening to it on radio. Remember his neighbor Gillis? Tom D'Andrea I believe. On a different note my mc-275 amp developed a problem so I put the ss amp back in and can hear an immediate difference in sound. The ss sound is good but sounds bottled up sort of. Probably better descriptive terms out there but it just seems closed in compared to the tube amp. Must be the different distortion in the tube amp.I have to go spray a couple of acres since it looks like no rain for a few hours.
