Hi Mark! You wrote:>> JVC just introduced a 3 CCD recorder capable of HDTV (1080i)>> resolution. Its just \$3499.00.....I'll take 3 at that low price.>> Expect to see more HDTV digital camcorders using miniDV format for>> much lower prices coming up in the next year or two. Most>> commercial shooters use the Sony and Canon commercial DV cams.>> These suckers range in price from \$5000-\$12000 depending on setup>> and features. Ha! Why stop at three? Take a dozen! Give 'em out next year as stocking stuffers! All jokes aside, that's actually good price considering pro digital cameras of just a decade ago were over \$50K a pop, and only capable of 480 line resolution. Long way from the early camcorders with a Saticon tube! Wayne
