   I am a total n00b at downloading video. But there is a documentary I'd like to acquire from some sites that use Bittorrent. I only have dialup so I don't even knowif it's practical. The doc. is called The Power of Nightmaresfrom BBC by Adam Curtis. But BBC says it's have this big problem making a dvd release. That leaves BitTorrent for getting a version for personaluse.   How does the d/l handle formatting? If the doc. wasdone in European Pal format, will the BitTorrent d/lmake something like a vcd file from the source? I'mwanting to make it playable on a zone 1 dvd system orrun it through a laptop w/projector hookup.
