Subject: How do you convey "emotion" through a device?

Hi John, here are some thoughts: 1. I fail to see how a device can convey emotion. It can certainly EXCITE emotion, and often that is to do with things like: a) how much was spent on it. b) what do the "critics" have to say about it? c) How does it look? which answers your previous question about why folks spend so much on cable. Cos it excites emotion. -akhilesh
