Subject: How long before I can lick my cabinet?

Actually, not me specifically, but my dog. I got myself a can of tung oil for the birch plywood One-Pi I built, and right there on the can is the old skull & crossbone poison symbol. I'm not going to feed the stuff to my dog, but she does have a habit of going around sniffing and licking things.After I use the tung oil rub on my cabinet, how long should I let it dry before I can have it out? Will the poison "go away" after the oil is dried?Gar.
