I wanted to make this message off the group.The suggestion is to make an icon out of your logo in the proper place in Windows. I'm using Firefox and have set up my bookmarks toolbarwith some things. If the icon image is stored in the rightplace, Firefox picks it up. This has worked for things likeIMDb, Green Bay Packers, Wonkette, The Wayback Machine and Pacifica Radio (for Democracy Now!) Your logo looks good and should show up even in the smallimage on the toolbar.
