Didja ever see the video where Frank Klausz makes an old-fasioned workbench and cuts the dovetail ends by by standing the 24"X72"X2" top up on the table saw? I wanta be like Frank! I cut all 4 ports with a no-drill-bit-hole-saw free hand with my Bosch for these 2Pi's. I was a little nervous but somehow avoided "porting" my legs. Safer to use the drill and belt sander.
