My last power amp, a SET 45 was built on an all wood chassis, and I think it turned out pretty nice. I was wondering if anyone had read the article in the link below, and what your thoughts are? Also, I'd love to see some variations on the non-metalic chassis, any creative deisgns out there? Seems like if we're not limited to fabricating metal, a lot of different stuff could be done.

Non Metallic Chassis
