Bob Daneliek built a PP 5687 amp very inexpensive. Awhile ago I had corresponded with him which is where I got the Idea for the 5687 pre and he said building the 5687amp with very high quality iron, then eventually converting to 2a3 is fairly simply done. Any thoughts?Or 6b4. Nice to contemplate a PP triode amp somewhere in the future as a logical extension of the 5687 project.
