I assume we're going with whatever schematic Tnuctipun sends us. Are there any lurkers out there thinking about joining in? Even if decide not to build with us, please understand this does eliminate you from the discussions. We're all here to learn, and rest assured I will ask the most basic (dumbest) questions. Don't let the technical talk scare you aware. I'm about as new to this as anyone, and I'm nervous enough for all of us.....Colin
