I just got back from inspecting the enclosures, and the workmanship is unacceptable both cosmetically and (more important) structurally. I can fix some of the structural problems but would still end up with an enclosure that I'd be embarassed to show with. While I do have another model I could show, I've decided to discontinue that model because I think I can do better. So Lori and I will not be attending the GPAF this year after all. It's too far to drive and too much cost to justify would turn into a non-business vacation. I hope ya'll understand.I'll miss seeing you Norris, Wayne, Akhilesh, Bill, Bob, Jim, Fred, and the rest of the Round Table crew.Duke
