Yeah, we're looking right at \$150 for two hunks of iron. I think I got the signal path straight in my head. I'm still fuzzy on the PS. Are there going to be three tubes, two diodes and one rectifier? I think the rest of the B+ PS is the tranny, choke and cap.I'm going to order some shieled 2-conductor wire w/drain (Belden 8450). This is what Doc used in the new SEX kit. Want me to pick some up for you? No problem to throw it in the mail your way.....Colin http://www.weisd.com/store2/BEL8450%20010U1000B.html
