THe cake-pan amp is linked to here. The Cecil County Library Bottleneck group. Successful in large part to Ray's efforts and acquiring the woderful(but difficult) room.Looking forward to hearing that pre-amp. There are a few other types of 6J6 you might want to look at. type 6099 is a ruggedized, matched section version, similar to the relationship between 6SL7 and 6SU7.regards,Douglas
