The cake-pan amp is linked to here. The Cecil County Library Bottleneck group. Successful in large part to Ray's efforts and acquiring the wonderful(but difficult) room. Looking forward to hearing that pre-amp. There are a few other types of 6J6 you might want to look at. type 6099 is a ruggedized, matched section version, similar to the relationship between 6SL7 and 6SU7. regards, Douglas
