Hi D; On Janurary the 21st. you posted a really nice simple hand drawn schematic of the power supply for Gueinevere. It was easy to follow and complete. Is there any chance I could prevail upon you to do the same for the amplifier section?I realise it is a lot to ask and I would understand totally if you are not able to do so. I just observed after perusing all of the back posts that your handrawn was the most easily accesible of all the schematics.Thanks and Thanks for all your help; J.R.(If you replay that post you will see what I mean, you labeled all the pin-outs for both rec tubes and that was very helpfull.)
