Subject: PCB for the CCS Posted by Damir on Tue, 15 Feb 2005 13:04:15 GMT View Forum Message <> Reply to Message

Here's the PCB "proposal", I hope that it'll works without (capacitive/oscillations) problems. I didn't try it, so far :-).See that "stopper" resistors R2 & R4 must be mounted with it's "body" close to the G-pin, "upward". Fix the heatsink somehow (little screws left and right through the board, or...?).Without "proper", photo process it can be made with nail-polish, then Fe-III-chlorid. Be carefull, good luck!
