I didn't try, but now there's good (Shuguang/SuperTnT) 845 on the market - but 700-1000V is only for very experienced players. PP 300B - I agree, in all the charts for any tube, SE is something like $R_a=4k$ and PP $R_{aa}=3k$ or so?! Probably - more power, distortion cancelation, NFB loop, AB class thinking.
