slight changes to accomodate what I have on hand. Hammond 261G6 with a hybrid SS/valve rectifier(still a 6CA4). Amplifier valves are 12B4's 'cause I don't need the gain and I already have two holes in the chassis from when it was the Foreplay Imposter built with 5687's.L-C supply with the big cap and a 157G Hammond. Chassis is only 5 3/4 by 11. space is at a premium. I hope I can cram it all in.regards,Douglas
