The 2 yellow are for the rectfier heater. for now don't hook the CT(Y/W) to anything. for a normal full wave rectfier you do not need to ct the heater. Let me know what rectifer you are useing as as to what pin to take power from.I am working day and night at the mines. I am sure Douglas will answer if I can't get back to you...JohnPS. I did get the CCS wired up will try to post a pic when I can
