What I have is;72.00 trans60 caps35 choke18connectors(RCA's IEC etc.)The Chassis was free from old partspassive parts 35donated mos-fetsLooking at about 250\$ all told. Considering the level of quality and design about 1/10 the price you would pay retail.The custom chassis I intended to use is 220\$ but nice; so you could go close to 500\$ with very high quality chassis.
