Here's a link to my little site that has them on there. I've currently got the Millett on a "sale pending payment" deal right now. Hopefully the guy goes ahead and buys it. I've got Jef at Abraxas selling me the little 12b4 amp he had at the show. I'm buying it either way, but I don't really need two headphone amps and I use the SOHA way more than the Millett, so I thought if someone would offer me what it's worth then I'd sell it, if not no big deal.

Headphone amps
