There`s a reference (about that subject) in M. Jones book, article "Hybrid Bridge Rectifier" by M. Watts, Electronics World, 1999.When I tried "Google" the article, it appears that you must paid for articles from the archives... not much (about $2 per .pdf article), but you need "Visa" or "MasterCard"...Anyway, again meeting with commercial world of science/knowledge/secrets in audio, vs. free informations/DIY sharings...
