Hey-Hey!!!,Any interest in a single CCS PP triode amp? I know the Merlin schematic with its CCS-rich circuits is a bit on the complicated looking side.Design Goals:Excellent soundRelatively simple~6WattsAvailable tubesL-C power supplyAvailable IronThe proposal:Input stage of 6BK7/6BQ7/6CG7/6H6PiResistive plate load, CCS in the tail, PP/Center tapped grid chokes, 6k6/20W OPTx. Individual, fixed bias.Several choices on the OPTx. None are expensive.Any interest?cheers,Douglas
