Yes, regard is needed in commenting other people designs, especially commercial, and especially when we don't have all the data, or didn't try the product Lundahl LL1667/15mA/270H anode choke specifies saturating $I_{dc}=25\text{mA}$ and max. AC signal voltage @30Hz = 390Vrms, $R_w=2k4$, but no C_w is given. Any C_w data known for some of your products?
