I at first thought the revival of interest in vintage equipment was a really good thing. Now it seems that the my collection is bigger than yours guys are taking over the field. So the folks who actually want to use the equipment are being priced out of the market for the second time I saw a nice Yamaha M-80 amp on CL but it was nearly 400.00. Inflated prices may hit a wall one of these days and level out. Probably be like gasoline though and hit a plateau and stay there I did pick up a nice Sony cd changer for the museum yesterday. It's nowhere near TOTL but works & sounds good and if I tape over all the buttons but the play and volume on the remote the old folks can work it
